ST. LOUIS SEED Co.

ATTENTION

We make a specialty of supplying Market Gardeners with the best strains of seeds that can be produced. We are always on the alert for a better strain, and if we find it we spare no expense in securing seed stock of it.

We handle absolutely nothing that we do not believe to be the best obtainable. We do not claim to compete in prices with irresponsible parties, whose sole effort is to secure the lowest priced seeds, regardless of quality; such seeds are not cheap, but dear at any price. The first cost of seeds is insignificant, compared with time and labor that must be expended upon a growing crop. Quality is our first consideration, and the prices we offer are as low as first-class seeds can be sold for. Parties buying in large quantities of any one variety will be quoted special prices on application.

TERMS OF GUARANTEE.

The seeds offered in this catalogue have been carefully grown, selected, cleaned and tested for germination, and we believe them to be first-class in every respect, but we cannot guarantee the crop as too many conditions enter into it, therefore we give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any seeds we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are to be returned at once, and if the money has been paid for them it will be refunded.

SEEDS BY MAIL.

If seeds are ordered by mail, postage must be added to these prices at the rate of 8 cents per pound of SEEDS, 10 cents per quart on CORN and 15 cents per quart on PEAS and BEANS. Packet, Oz. and $\frac{1}{4}$ lb. no charge for postage. **SEEDS CANNOT BE SENT AT ZONE RATE, BY PARCEL POST.**

TERMS OF BUSINESS.

 Remittances should be made by Postoffice Orders, Drafts on St. Louis banks, or Express Money Orders. Where it is not possible to obtain these, the letter should be registered. We cannot guarantee receipt of money sent in any other way.

 Goods desired C. O. D. must be accompanied by a partial remittance to guarantee acceptance.

 All goods are offered subject to being unsold on receipt of order, and we reserve the right to advance prices without notice.

 No charge is made for boxes or packing, nor for delivery to Freight Depots or Express Offices in St. Louis, Mo.

 In filling out your order always give **Shipping Directions**, and write **Name and Address Distinctly** on each and every order.

Vegetable Novelties 1914

St. L. S. Co.'s Stringless Bountiful Bean

A FLAT, GREEN-PODDED BUSH BEAN

THIS superior variety is a distinct improvement in green Bush Beans and has become exceedingly popular wherever known.

The plant is remarkably handsome and of thrifty growth, being practically rust and mildew proof. It is very hardy, extremely early, very prolific and bears continuously for several weeks; it is the first to give pods fit to pick in the spring, and the last to yield edible pods in the fall.

But the crowning merit of this grand Bush Bean is in the rich green pods, which are of immense size, thick, broad, extra long, very uniform in shape, solid, meaty and of high quality, meltingly tender and having a delicious flavor exclusively their own; moreover, the pods are absolutely stringless and entirely free from tough, membranous lining, not only when young, but this tender "snap brittle" quality is retained even into maturity.

Price: Pkt., 5c; Half Pint, 10c; Pt., 15c; Qt., 30c; Gal., 80c; Pk., \$1.60; Bu., \$6.00.

St. L. S. Co.'s New Stringless Wax Bush Bean

THIS new round-podded Dwarf Wax Bean has attained the top notch among Beans of this class. It has been so highly bred and selected that it excels all others in its combination of essential qualities, among which are remarkable uniformity in size and shape. It produces no culls, the pods average five to six inches in length, which is unusually large for a round-podded, wax variety; they are very solid, meaty and tender, free from string, breaking brittle, and the flavor is unsurpassed. These desirable table qualities are retained well on towards maturity, long after many other sorts have become too tough and stringy to use. The plant is everything desirable, bushy and robust, free from rust or mildew, and extremely prolific. Price: Pkt., 10c; Half Pt., 15c; Pt., 25c; Qt., 50c; Gal., \$1.25; Pk., \$2.25.

Fordhook Bush Lima Bean

(By mail add 15c per Qt., for postage)

BOTH pods and beans are twice the size of ordinary Bush Lima. Its growth is of stiff erect habit, branching freely but with all the branches held upright. Like Burpee's Bush Lima, the stalks that produce the blossoms are thrown out from the lateral and main stalks; the pods are borne in "clusters" of from four to eight. The pods resemble those of the (Dreer's) Bush Lima, but average more than double the size.

It is the heaviest yielder of all the large size Bush Limas and is sure to take the place of Burpee Bush Lima as well as Henderson's Bush Lima. Price: Pkt., 10c; $\frac{1}{2}$ Pt., 20c; Pt., 30c; Qt., 60c; Gal., \$2.00; Pk., \$3.75; Bu., \$14.00.

St. Louis New White Cornfield Pole Bean

IN this new Pole Bean we have one that far surpasses anything on the market. We have not had surplus stock to offer to all before but have only a limited supply this season. This Bean is a cross between our regular White Cornfield and Kentucky Wonder; it is a fine long pod, round, thick and meaty green pod, with a white bean. It is a much heavier bean and far better shape than others, and will continue to bear far longer. We are the only ones who can offer you this new bean, and we are sure you will be highly pleased with the results. Price: Pkt., 10c; $\frac{1}{2}$ Pt., 15c; Pt., 25c; Qt., 40c; Gal., \$1.25; Pk., \$2.00; Bu., \$7.50.

St. L. S. Co.'s Genuine Butter Pole Bean

WE offered these old-time favorites for the first time a few seasons ago, and the demand has since grown phenomenal. Remember, it is the original old-time Butter Bean so much sought after by our parents and grandparents years ago. Vines grow very vigorously and are laden with mammoth wide pods, containing from 3 to 5 beans each. Price: Pkt., 10c; $\frac{1}{2}$ Pt., 15c; Pt., 30c; Qt., 50c; Gal., \$2.00; Pk., \$3.75; Bu., \$14.00.

Early Evergreen Sweet Corn

Sweet Corn by Mail add 10c for Postage.

READY for table with the second earlies, such as Shaker's Early, etc., but is fully twice as large as any of them. The ears carry an average of 16 rows of fine large, deep, white and very sweet grains, which are second to none in tenderness and flavor. The stalk is very strong, sturdy and of only medium height; the leaves broad and dark green in color, a habit of growth which gives it great endurance during a dry time. Especially adapted for early trucking; also very desirable for the home garden. Price: Pkt., 5c; $\frac{1}{2}$ Pt., 10c; Pt., 15c; Qt., 25c; Gal., 50c; Pk., \$1.00; Bu., \$3.50.

Golden Bantam Sweet Corn

One of the Sweetest Corns Grown.

GOLDEN Bantam is a dwarf-growing early variety. The plant attains a height of only 3 or 4 feet, usually bearing two or more ears about 5 inches long to a stalk. These little fat ears are compactly filled with kernels, which, when ready for the table are cream-yellow, so lusciously sweet, tender and milky that some people claim it "the sweetest corn on earth." Golden Bantam is one of the hardiest corns grown, therefore can be planted earlier with safety than any other varieties. Price: Pkt., 5c; $\frac{1}{2}$ Pt., 10c; Pt., 15c; Qt., 30c; Gal., 75c; Pk., \$1.25; Bu., \$1.50.

"American King" Cabbage

SUCCEEDS WHERE ALL OTHER VARIETIES FAIL. THE BEST KEEPER.
THE LARGEST HEADED. THE FINEST QUALITY.

This is the Cabbage that has made more money for gardeners than any other variety ever discovered

INTRODUCED by us in 1904, it has met with universal praise everywhere. Mammoth solid heads, weighing from 25 to 30 pounds are common sights in a field of this wonderful late Cabbage. We could not offer you anything better if we had the world's entire output of cabbage to select from. Its chief points of merit are in absolute reliability as a sure cropper, its uniformly large size of head, its great drought and worm-proof qualities. A very prominent and distinct feature of the **AMERICAN KING** has a small number of ribs and their remarkable smallness in size. This stamps it of the highest quality. Price: Pkt., 10c; ½ Oz., 20c; Oz., 35c; ¼ Lb., \$1.25; Lb., \$5.00.

New Early Cabbage Copenhagen Market

THIS superb new Cabbage is undoubtedly without a rival as the **finest large round-headed early Cabbage** in cultivation. The type is thoroughly fixed, the heads maturing all at the same time—(this being a great consideration to Market Gardeners, entailing less labor in harvesting the crop and allows the ground to be cleared at the first cutting). The heads average about eight pounds each in weight, are very solid, with small core and of fine quality. It matures as early as **Charleston Wakefield**, and will give a much heavier yield per acre than that popular variety. The plant is short-stemmed, the heads being produced almost on the ground level. The leaves are light green, rather small saucer-shaped, and always tightly folded. Price: Pkt., 10c; ½ Oz., 25c; Oz., 50c; ¼ Lb., \$1.75; Lb., \$6.00.

Pride of Denmark Cauliflower

The Earliest Forcing Variety in Existence

THIS is the great new Cauliflower that we introduced two seasons ago. We challenge the world to produce the equal of this new white Cauliflower wonder. It is the finest, the handsomest and the earliest Cauliflower in the world, as well as the largest species ever discovered. It is gorgeous beyond description. Its color is snow white, and its growth is of the most compact form. For an outdoor variety it cannot be surpassed. You who have been planting the Dwarf Erfurt and Snow-ball varieties should give this new introduction a trial this season. It has been thoroughly tested in this locality and is a sure cropper. Price: Pkt., 25c; $\frac{1}{4}$ Oz., \$1.15; $\frac{1}{2}$ Oz., \$2.00; Oz., \$4.00.

Pride of Denmark.

Improved Green Hybrid Cucumber

WE now offer the perfect Cucumber in our "Improved Green Hybrid," an extra early specie of a most remarkable quality and appearance. Its unique shape and handsome color predict for it a vegetable of immense popularity, its color being of a dark green, slightly ridged. It is enormously prolific and a continuous producer. For slicing it is superb, its symmetrical fruits are uniformly large. The flesh is very solid, fine grained. The vines are vigorous and mildew-proof; in fact for general use we unhesitatingly recommend it superior to any other variety. Price: Pkt., 5c; Oz., 10c; $\frac{1}{4}$ Lb., 25c; Lb., 75c.

Golden Self-Blanching Celery (French Grown)

THIS grand variety of French origin is becoming more popular every year, and is now one of the most extensively grown sorts, both for private use and for market. It is not as early as White Plume, though it possesses the same self-blanching characteristics and is of heavier and more compact growth, the stalks being thick, crisp and brittle, while the hearts are large and solid, all blanching a beautiful waxen-yellow; the quality is superb, tender and free from stringiness; flavor rich and delightful. ... Price: Pkt., 10c; $\frac{1}{2}$ Oz., 65c; Oz., \$1.25; $\frac{1}{4}$ Lb., \$1.25; Lb., \$16.00.

Frankfort Carrot.

Witloof Chicory, or French Endive

DURING the winter this is sold by dealers in fancy fruits and vegetables as "French Endive," and the large importations during last winter caused considerable inquiry of us regarding its culture. In order to grow good "Witloof" the seed should be sown during April in the open ground, in drills 10 or 12 inches apart, in deep, rich soil. Allow the plants to grow until November, keeping free from weeds and watering if necessary. Then take up the roots and trim off the leaves to about 1½ inches from the neck, break off any shoots which may appear on sides of root, and shorten lower end so that all will be of a uniform length of 8 to 10 inches. Then plant in a trench 8 to 12 inches deep, placing the roots upright, about 1½ inches apart. This will leave the necks of the roots about 8 inches below the level of the ground. Fill up the trench with good, light, well-drained soil, and, if speedy growth of any portion of the crop is desired, it may be accomplished by covering with a layer of manure at least 10 inches deep. In about 4 or 5 weeks the leaves will attain their proper size, and the manure may be taken off and roots dug up. The blanched head is the edible portion, and should be cut off, leaving a portion of the neck attached to it. Witloof is eaten raw or as a salad, and is also sometimes cooked like ordinary Endive. Price: Pkt., 5c; Oz., 20c; ¼ Lb., 60c; Lb., \$2.00.

Grown largely on account of its great productiveness and adaptability to all classes of soil. Tops of medium size. Roots of medium length, six to eight inches long, tapering uniformly to a blunt point. Flesh deep orange, crisp and tender. Although the roots of this variety are comparatively short they produce as large a bulk as the longer field sorts and are more easily harvested. Price: Pkt., 5c; Oz., 10c; ¼ Lb., 35c; Lb., \$1.25.

It is exceedingly prolific and no variety can surpass it in quality. It will hold up longer before getting soft and turning yellow than any variety we know of. The netting is heavy, slightly covering the ribs. It averages a trifle larger than Burrell Gem. Anyone growing melons either for shipping or local market should not fail to try this valuable variety. Mushroom Culture (Champignon-Brut)

The bed is finished by covering all with 4 or 5 inches of straw or other litter. Watering is not necessary unless the surface of the bed gets very dry; in this event moisten freely with water at a temperature of about 80 degrees. In gathering the crop do not cut, but twist them off carefully filling up the holes with loam to keep insects from the roots. In six or eight weeks from spawning the beds, mushrooms should appear.

GENUINE ENGLISH MILLTRACK SPAWN—Large Brick—One pound English Spawn will spawn about 6 square feet.

Postpaid 25c. By Express or Freight, Brick, 20c; 6 for \$1.00; 50 Lbs., \$4.50; 100 Lbs., \$8.00.

MAY be grown in a great variety of situations—a dark room, cellar, stable or elsewhere. Any place in which an even temperature of about 50 or 60 degrees can be kept, is suitable. For materials for the bed, use fresh horse manure, free from straw or chips, and good loamy soil. Some growers use the manure unmixed with loam, after first having well fermented it by alternately piling up and mixing for a few weeks; but it is undoubtedly better not to allow the manure to heat much before forming the bed. Use one-fourth to one-third loam, the rest manure. Mix very thoroughly and upon a dry, firm bottom; make the bed of this mixture about four feet wide, and of any desired length. Build it up evenly, pressing it down very firmly, and leave it about a foot high. It will shortly begin to heat. Use a thermometer to thrust into bed, and note the temperature. When the heat has partially subsided, leaving a temperature of 70 to 80 degrees, put in the spawn. Pieces from the size of walnuts to that of eggs are placed in the bed about a foot apart, deep enough to cover them well, and the manure pressed down. Let it remain thus ten or twelve days; then cover with two inches of fresh loam, and make this moderately firm.

Hardy Everblooming Roses

This collection of Everblooming Roses embraces only popular, well-tried varieties, the majority of which are familiar to every lover of the Rose, and is recommended for general planting to the amateur who wishes to limit the number of varieties and who is desirous of a supply of extra choice flowers to cut throughout the summer and fall months.

Varieties marked "H. P." are Hardy Perpetual. "H. T.," Hybrid Tea Roses.

"AMERICAN BEAUTY"—A hardy Rose of the largest size, having the ever-blooming qualities of the Tea Rose, consequently equally valuable for winter or summer flowering. In color, it is deep, brilliant rosy-carmine, shaded toward the center with rich carmine-crimson. This is unquestionably the most popular Rose now before the public, a popularity due entirely to its splendid value as a winter-forcing variety. It has, however, much value as a garden variety and is very much sought after.

GRUSS AN TEPLITZ (H. P.)—This grand rose has proved one of the best and most valuable Hardy Crimson Ever-blooming Roses for garden planting. The color when first opening is a very dark, rich crimson; as the flower opens it discloses bright scarlet, shading to velvety, fiery red. The flowers on well grown and established plants are large and full, very showy and handsome. It is a prodigious bloomer, one of the freest known, remarkably healthy and vigorous, almost immune from all diseases.

J. B. CLARK (H. P.)—Brilliant crimson with intense scarlet lights on the upper surfaces. In size, form, color and texture it stands supreme in its color. It is very fragrant, a vigorous grower, fine foliage.

BARON DE BONSTETTEN (H. P.)—Blackish crimson, vivid red shadings. Considered by many to be the finest dark crimson Rose.

DUKE OF EDINBURGH (H. P.)—Very bright vermillion; a large, full, perfect flower.

FRAU KARL DRUSCHKI (H. P.)—This is the ideal hardy white Rose, pure in color, perfect in form; strong grower and remarkably free flowering; superb in every way.

GENERAL JACQUEMINOT (H. P.)—Brilliant scarlet-crimson; an old favorite and one of the best known Roses in cultivation; does well everywhere.

MRS. JOHN LAING (H. P.)—Soft pink; large and of fine form, produced on strong stems; exceedingly fragrant; one of the most valuable varieties and flowers continuously in the open ground. The most beautiful rose of recent introduction.

KAISERIN AUGUSTA VICTORIA (H. T.)—Pearly white softly tinted with lemon in center; fragrant. A strong, healthy grower, with bold, beautiful foliage. Particularly hardy, and one of the most beautiful roses in cultivation.

WM. R. SMITH (H. P.)—This magnificent variety is an American-raised, pedigree seedling. It inherits hardiness, constitution, fine habit, grand foliage and superb flowers. Where there are so many good qualities it is difficult to emphasize the leading one, but in this variety we would name its ability to resist disease. The color is a deep ivory-white overlaid with a good, bright shade of pink. As a summer rose it ranks with the best.

Dwarf Roses—Continued

RICHMOND (H. T.)—One of the best red Roses yet produced. It comes to perfection with very little care. It is a constant bloomer, very fragrant, with a color approaching a deep scarlet in tone. It has long pointed buds on tall, straight stems, with elegant dark foliage. A superb Rose in every sense of the word.

ETOILE DE FRANCE (H. P.)—Is a strong grower, excessive bloomer, almost thornless. It has beautiful dark green foliage, splendid buds, generally appearing singly on long, strong stems; flowers are very large and beautiful in shape, very full and open easily; color superb garnet red, center of flowers very vivid.

LA FRANCE (H. T.)—An old favorite, and probably the most popular Rose the world over. A model garden Rose in every way; flowers clear satiny pink; large, very full and of perfect form.

MAGNA CARTA (H. P.)—Bright pink suffused with carmine; a beautiful Rose and a strong, vigorous grower.

HERMOSA (H. T.)—The color is a clear, fresh, bright pink. The flowers are fairly double, cupped petals and of medium size; they are borne in clusters and in lavish profusion. It is hardy with protection and is sweetly fragrant.

WHITE KILLARNEY (H. T.)—A pure white "sport" from the pink Killarney; equal to it in all the good points of the latter, superior to it in some. One strong point of superiority is that it has more petals than the parent variety, of greater substance, so is of greater value for outdoor bedding. The buds and flowers are beautiful beyond description; many consider it easily the finest white garden Rose in cultivation.

PINK KILLARNEY (H. T.)—A very beautiful Hybrid Tea Rose. The color is an exquisite shade of deep shell-pink lightened with silvery-pink. The base of the petals is a soft silvery-white, relieved with enough yellow to make it more attractive. The buds are exceptionally long and beautifully formed, the open flower is graceful in the extreme. Hardy in this climate without protection. In the garden the flowers are very lasting, the coloring remaining clear and bright to the last, delicate Tea Rose fragrance.

MME. RAVARY (H. T.)—Should be in every collection on account of its distinct color which is of a rich, deep nautkeen-yellow, becoming lighter as the flower expands. The flowers are of splendid form, full, double and very fragrant.

SOLEIL D'OR (H. P.)—The coloring of the flowers is very rich, a marvelously rich shade of chrome yellow with a glint of coppery-rose in the center. The expanded flower is full, large and globular, the center petals being well incurved, forming a perfectly double bloom. The coloring in the fully expanded flower is gloriously superb, Turneresque in its blending of reddish-gold, orange-yellow.

PAUL NEYRON—One of the finest hardy Roses ever grown. It blooms unceasingly from June to November, on uniformly long, stiff, thornless stems, with immense cup-shaped flowers. Colors a bright ruddy pink.

Iris Kaempferi

JAPANESE IRIS

THESE magnificent Irises are among the most beautiful of our summer-flowering plants, and are destined to become more popular every season. They commence blooming about the middle of June and continue in bloom for five or six weeks. Many of these flowers measure from 10 to 12 inches in diameter, and rival the orchids in their rich colorings and markings. While the Iris succeeds in almost any soil, and under any conditions, they delight in a rich, deep, wet position, and should be abundantly supplied with manure and water. Grow about 30 to 36 inches high.

Iris.

Lily of the Valley

A LOVELY little hardy perennial, widely planted everywhere for its delicate sprays of drooping white bells and their delightful fragrance. Is often starved and neglected and relegated to some poor, out-of-the-way corner; but this popular and fragrant subject, like most other plants, repays for being well treated; and if the bed is given a liberal top-dressing of well-decayed manure, along in February or March, it will show the effect by increased size, number and vigor of the flowers. The stock we offer is strong clumps, especially suited for outdoor planting, which should be done before the end of April. Price: 25 for 50c; 100 for \$2.00.

They do their best in deep, rich loam; set the plants out very early spring; give them water occasionally during dry spells in the early part of the season. After flowering the plants die back, usually reappearing along in early September, or as soon as the weather gets cool. During this resting period care should be taken in cultivating the beds that the roots are not disturbed. Mixed colors. Price: Each, 20c; Doz., \$2.00.

Gladiolus

A SEARCH, be it ever so painstaking and complete, of the floral kingdom, will discover no flower of such easy culture, embracing the great range of color with endless combinations and variety, to equal the Gladiolus. It is rightfully called the people's flower. Even the orchid fails to equal it. Our bulbs are of the finest quality and will give bountiful satisfaction the first season. The bloom is continuous from end of July until frost. Plant the bulbs at intervals from April to June, retaining the strongest bulbs for the later plantings. The soil should be thoroughly manured and prepared and if the soil is stiff, fill the drill with sandy loam. Any fairly good garden soil will grow Gladiolus. Plant in full exposure to the sun. Set the bulbs 2 to 4 inches deep according to the size, and 4 to 6 inches apart in each direction. We recommend mass planting in square, oblong or round beds. They are also very effective when planted in clusters among Shrubs, Roses and Paeonies.

In cutting Gladioli for the house, it is best to cut the spikes as soon as the first one or two lower flowers are open. The remainder will open in the house. Remove the faded flowers, cut a little off the stem, and change the water every day; treated in this way, a spike will last a week or ten days.

America

A splendid new Gladiolus. The color is a soft pink very much like the Enchantress Carnation except slightly tinged with lavender, effecting a perfect color harmony. A splendid bedding sort and an excellent cut flower. In 1907 the America was awarded the Certificate of Merit, by the Horticultural Society of Washington, Boston and New York. It is undoubtedly the most desirable variety in the market. Extra large bulbs. Price: Doz., 40c; 100, \$3.00.

Augusta

A magnificent white variety, very popular with florists for cut flowers. Price: Doz., 40c; 100, \$3.00.

May

This Gladiolus being so very cheap, and so very handsome and valuable as a cut flower, should be most extensively planted by florists and others who grow for market. It makes a beautiful spike, compact and perfect, while the individual blossoms are of great substance and will stand shipping without bruising better than any other variety. Its color is one of the most attractive as well as one that is in great demand, being almost pure white, with markings of bright rosy crimson. Price: Doz., 40c; 100, \$3.00.

Princeps

GIANT FLOWERED GLADIOLUS—This magnificent new hybrid is an unusually healthy robust variety, producing spikes often 3 feet long, carrying from 18 to 22 broad, round-petaled immense flowers, about 6 inches across, of perfect and open form and waxy substance. The coloring is glowing scarlet-crimson, enlivened below the throat by a large-feathered white blotch sprinkled with scarlet. The spikes continue to lengthen and produce bloom for several weeks; often four of these glorious flowers are expanded at one time, and, on account of the vigor of the plant, the tip buds develop almost as large and perfect flowers as those at the base, and frequently side growth and spikes are produced, thus lengthening the flowering period. Price: Doz., 60c; 100, \$4.50.

Brenchleyensis

Vermillion-scarlet; an old variety, but much wanted on account of brilliant color. Price: Doz., 25c; 100, \$1.75.

Mrs. Frances King

In many ways the best in the list. A rank, thrifty grower; very large flowers, often 5 inches across and a beautifully shaped long spike. Often almost 2 feet of flowers in bloom at once. Light scarlet, with deep markings. Price: Doz., 40c; 100, \$3.00.

Blue Jay

BARON HULOT—Rich, royal violet-blue. This, when cut in combination with Sulphur King, is truly exquisite. Price: Doz., 40c; 100, \$3.00.

Gandavensis Mixed

A beautiful crimson and yellow type; produces an elegant flower, fine for marking with other separate colors along the fence or house. Price: Doz., 20c; 100, \$1.25.

Hardy Japan Lilies

LILIES have always been regarded as among the most beautiful of garden plants. Of queenly beauty, faultless purity and stately form, too much cannot be said in their praise and we are glad to notice their increasing popularity from year to year. Nearly every variety will, with a little care, endure the severity of our winters and many are among the most hardy of our garden flowers.

Tuberose.

Bulbs should be planted as soon as the frost is out of the ground; the earlier the better. Select a well drained spot, dig the soil deep and make it fine, enriching it abundantly with well rotted cow manure, adding a liberal mixture of sand. Set the bulbs from three to five inches deep according to size. During the winter it is advisable to cover the surface of the bed with a thin layer of manure which will afford a slight protection to the bulbs and also materially enrich the soil. In spring the manure may be removed or dug in between the rows. Care should be taken that they have proper drainage, no water being allowed to stand around the roots. Once firmly established, they should not be disturbed oftener than once in five years.

AURATUM—The glorious, gold-banded lily of Japan and one of the most superb plants in cultivation. Its immense ivory-white flowers are thickly studded with yellow and crimson spots, while in the center of each petal is a golden band, fading at its edges into the white. Such choice bulbs as we offer, if well cared for, will give from five to ten magnificent flowers the first year and under good cultivation will, after becoming well established give from ten to fifty. Price: Each, 15c; Doz., \$1.50.

SPECIOSUM ALBUM—Pure white flowers with a greenish band through the center of each petal; of great substance, very fragrant. One of the best for general culture. Price: Each, 15c; Doz., \$1.50.

The six broad, white or pink petals are thickly dotted with rose or crimson spots and the graceful form and brilliant color make them very effective and desirable. Especially thrifty and hardy. One of the best for garden culture. Price: Each, 15c; Doz., \$1.50.

Select Dahlias

A Few Cultural Notes

ONE of the most important points in the cultivation of the Dahlia is to select a well-drained position where they will receive the full benefit of the sun during the greater part of the day.

As to soil, they are not at all particular, excepting that in the case of a stiff clay some loose material should be added, such as coarse sand, old mortar, or anything which will make the soil loose and friable. The soil must be deeply dug, if possible to a depth of two spades, and a liberal amount of suitable plant food incorporated. For this nothing is more satisfactory than pure bonemeal, and sheep manure.

Show and Fancy Dahlias

THE name Show applies to varieties producing large, well formed flowers, having only solid colors, but may frequently have shaded tips. Fancy embraces all the variegated varieties.

A. D. LIVONI—A splendid clear pink, beautifully quilled, of perfect form, and very free-flowering.

RED HUSSAR—Tall, bushy, upright; with wrinkled highly ornamental foliage. Flowers, full, recurved to ball shape—fiery cardinal, with bronze edge at bottom.

Purple King

THE introducer of this Antirrhinum claims it is a decided advance in the size of the individual flower of any Antirrhinum yet produced. It is of robust habit, the flowers being almost twice the size of any existing variety; the color is a deep, glowing purple, and they are borne in splendid spikes.

This improved "Snapdragon" forms brilliant garden beds, flowering profusely and continuously the first season from seed. Unusually effective bedding displays are made from these noble plants; they grow about 2 feet high, are healthy and stocky, and completely enveloped with large flowers of splendid texture and substance, rendering them very durable under all conditions of weather; their continuous-blooming qualities, ease of culture and independence of heat and drought, and pure color, should entitle them to a permanent place in gardens. Although perennials, they do splendidly when grown as annuals; spring-sown seed produces flowering plants by July, which continue to bloom in increasing profusion until frost. The flowers are nearly double the size of the older sorts. Price: Pkt., 20c.

Begonia

Everblooming Bedding Variety

As pot plant for winter flowering they are superb, remaining a sheet of bloom throughout the entire year. Easily raised from seed, which should be started either indoors or in a hotbed. Price: Pkt., 15c.

Very effective for autumn flowering in broad masses or backgrounds. A hardy and rapid growing annual, forming bush-like plants with feathery green foliage five to six feet high, covered with large flowers somewhat resembling the single dahlia. They are gracefully poised on long stems and are very useful for decorative purposes. Sow outdoors early in spring in rather light soil, not too rich, and preferably in a sunny situation. Cover the seed with one-fourth to one-half inch of fine soil firmly pressed down. If planted in rows, make the rows about two feet apart and when the young plants are well up thin from four to six inches apart in the row. Price: Pkt., 10c.

St. L. S. Co.'s Long-Spurred Hybrids

THIS beautiful strain of Columbines comprises new and pleasing shades and combinations, ranging through all the shades of lavender, blue, mauve, white, yellow, orange, scarlet and bright rose-pink. The plants are perfectly hardy, vigorous and stately growth, produce abundantly large and elegantly shaped flowers with long spurs. A very desirable, easily grown, old fashioned perennial for borders, forming large, permanent clumps. Blooms profusely early in the season and remains in bloom for a considerable period. The peculiar pendant flowers are exquisitely formed, in various color, with long spurs. No bed of perennials should be considered complete without Columbines. Sow the seed which is of rather slow germination, in open ground early in spring in any rich, well drained garden soil. In permanent bed plants should have at least one foot each way. Keep clear of weeds and give each year a dressing of well rotted manure. Seed may also be sown outdoors in fall. Price: Pkt., 15c.

St. L. S. Co.'s Late-Branching Asters

THIS superb strain, of American origin and especially adapted to our climatic conditions, now one of our leading specialties, extraordinary care being given each season to the selection of the very finest specimens for stock seed, resulting in a strain that is acknowledged by the leading growers as unsurpassed.

The plants form strong, branching bushes, 2 to 2½ feet high, bearing on long, strong stems their handsome Chrysanthemum-like flowers, which, under ordinary cultivation, averages over 5 inches across. The form of the flowers, together with the length of the stems, places them at the head of Asters for cutting. They come into bloom from two to three weeks after the average type, usually being at their best during September, and filling in the gap between the general run of Asters and Chrysanthemums. We offer six beautiful and distinct colors: White, Rose, Lavender, Purple, Crimson, Daybreak Pink and Mixed. Price: Pkt., 10c.

The orange-rose wings roll and fold; the standard is reflexed, showing the distinctly fluted effect, and is of an intense rich crimson orange. Price: Pkt., 10c; Oz., 25c; ¼ Lb., \$1.00.

KING EDWARD SPENCER—The standard measures from one and three-quarters to two inches across by one and one-quarter inches deep. The unusually large wings make the flowers appear truly gigantic in size. The standard is a deep rich carmine-scarlet of glossy effect. The wings are also carmine-scarlet and on the reverse side are of a deep rosy carmine. Price: Pkt., 10c; Oz., 25c; ¼ Lb., \$1.00.

MRS. JOSEPH CHAMBERLAIN SPENCER—A beautiful silvery white, striped with rosy pink, making a very gorgeous effect. Price: Pkt., 10c; Oz., 25c; ¼ Lb., \$1.00.

MRS. WALTER WRIGHT SPENCER—The flowers are self-colored, of a pinkish-cream tint when first opening, changing to mauve and then to a reddish violet. A very handsome and effective, one of the best varieties. Price: Pkt., 10c; Oz., 25c; ¼ Lb., \$1.00.

OTHELLO SPENCER—This beautiful new Sweet Pea is decidedly the best of all dark Spencers. The flowers are beautifully waved or crinkled both in standard and wings. The long stems are thick and carry well either three or four, fine blooms of a rich deep maroon. It is a strong grower and flowers most profusely. Price: Pkt., 10c; Oz., 25c; ¼ Lb., \$1.00.

PRINCE OF WALES SPENCER—(Marie Corelli) A brilliant rosy-red of exceptional large size. Price: Pkt., 10c; Oz., 25c; ¼ Lb., \$1.00.

PRIMROSE SPENCER—Morse's Extra select strain. The finest of its class, clear primrose color, fine large wavy standard and wings; white seeded. Price: Pkt., 10c; Oz., 25c; ¼ Lb., \$1.00.

TENNANT SPENCER—This is decidedly the best of the heliotrope shades. It is self-colored in most attractive rosy purple and comes entirely true. The flowers are of large size, of fair Spencer form and gracefully carried on long stiff stems. Price: Pkt., 10c; Oz., 25c; ¼ Lb., \$1.00.

WHITE SPENCER—Produces in the greatest profusion pure white flowers of truly gigantic size. It is white-seeded and the flowers are extremely beautiful. The wings are fully an inch wide and nearly as deep as the standard. The flowers are borne three and four to the stem and are uniformly well placed. The stems are extra strong and measure from twelve to fifteen inches in length. The vines are most vigorous in growth, with heavy foliage, and attain a height of eight to ten feet. They are almost completely covered with bloom, while the flowers retain their large size throughout the season. As now "Re-selected," this is the largest and most beautiful of all white Sweet Peas. Price: Pkt., 10c; Oz., 25c; ¼ Lb., \$1.00.

Queen Alexandria

THIS is an intense scarlet self of grand texture—a bold expanded flower of finest form. It is very free flowering and the flowers are of giant size with long strong stems. This grand flower does not burn in the sun, and might be described briefly as a larger, finer “fadeless” “Scarlet Gem.” Price: Pkt., 10c; Oz., 20c; ¼ Lb., 75c.

Queen of Spain

THE flowers, of fair size, are self-colored in a delicate peach-blossom pink with slight apricot tinge. The color effect is a self buff-pink, resembling that of Countess of Latham, but is lighter and comes entirely true from seed. Price: Pkt., 10c; Oz., 20c; ¼ Lb., 75c.

Mrs. Alfred Watkins

FLOWERS of large size, beautifully formed and widely spreading, with the wavy or crinkled effect so much admired. Both standard and wings are a clear pink color which is suffused over the entire flower, but rather deeper and heavier at the outer edges. Price: Pkt., 10c; Oz., 20c; ¼ Lb., 75c.

Helen Pierce

THE color is very light blue, mottled on pure white. It does not show any suggestion of stripe but is uniformly marbled or mottled. Of good size and perfect shell shape. Price: Pkt., 10c; Oz., 20c; ¼ Lb., 75c.

Sweet Peas—Continued.

St. L. S. Co.'s Spencer Mixture

IN offering you this mixture of all the latest introductions, these “Spencers” include the best of the “Spencer” varieties introduced previously to this year and also entirely new shades, varying depths of lavender, light and darker blue, several shades of scarlet, beautiful pinks from extremely light to very deep and rose colored, several striped and mottled varieties, together with a few deep purple and several shades of maroon. The flowers are all of extremely large size, most beautifully frilled and waved on the standard, with well-waved wings. While the plants are vigorous in growth and the gigantic flowers are borne most profusely on long strong stems, yet like all varieties of the true “Spencer” type they are extremely shy seeders and the seed can never be produced cheaply unless this superb strain should be allowed to deteriorate. Price: Pkt., 10c; Oz., 15c; ¼ Lb., 50c; Lb., \$2.00.

Grandiflora Varieties and Unwin Types

THE Grandiflora Sweet Pea is a distinct advance in the development of the Sweet Pea. No modern garden is complete without this grand type. The chief characteristic of the Grandiflora Sweet Peas is their robust growth, plants frequently attaining a height of from 6 to 10 feet, requiring a foot of space in the row for each plant to fully develop. The flowers are gracefully formed; both standard and wings are larger than the standard type.

E. J. Castle

THE color is a rich carmine-rose with salmon shading in the standard. This rich color with the bold wavy standard of the Unwin type makes a most striking effect, especially in artificial light. Price: Pkt., 10c; Oz., 20c; ¼ Lb., 75c.

Frank Dolby

A LOVELY light lavender, the same shade as Lady Grisell Hamilton, but of the Unwin type, with bold wavy standard and widely spreading wings, beautifully fluted. Price: Pkt., 10c; Oz., 20c; ¼ Lb., 75c.

Gladys Unwin

A BOLD flower, with striking upright standard which is crinkled and waved; broad wings. Of a lovely light pink color. Price: Pkt., 10c; Oz., 20c; ¼ Lb., 75c.

Phyllis Unwin

THE flowers are larger in size than the original Gladys Unwin and similarly crinkled wavy standard with broad wings. The long stout stems carry three and four flowers each; of a beautiful rose color throughout. Comes perfectly true. Price: Pkt., 10c; Oz., 20c; ¼ Lb., 75c.

Nora Unwin

A VERY beautiful pure white variety, finely waved or fluted. The flowers are borne generally three on a stem, and while not so boldly spreading as are the flowers of White Spencer, the standard is distinctly erect and the wings curve in closer to the keel. Of good substance and a finely effective flower, it has been pronounced “the next best white” to White Spencer and comes true from seed. Price: Pkt., 10c; Oz., 20c; ¼ Lb., 75c.

How to Grow Sweet Peas

THE soil for Sweet Peas should be rich and deep. A good rich loam, with plenty of well-rotted manure in it, is the ideal soil for raising good plants that will produce plenty of blooms of good substance. Soils that are at all heavy are best dug in the Autumn, and during the Winter months a good dressing of Sheep Manure should be given it. They should be in a position fully exposed to the sunlight and air on both sides of the row.

Much depends on the state of the weather as to when the seed may be sown out-of-doors; but they should be sown as early in the season as the ground can be worked, which is usually between the middle of March and the middle of April in the latitude of St. Louis. It is best to make a trench or furrow about four inches deep, in the bottom of which sow the seed thickly. Cover the seed with about two inches of soil, pressing it down firmly. As soon as they are above ground, thin out to two to four inches apart; when planted too close they do not attain their full development. They should be staked up either with branches of brush or stout stakes on which wire netting has been fastened.

Sweet Peas

Standard Varieties

NO garden is too small for a row of Sweet Peas and no estate, however extensive or magnificent, should fail to include many varieties of this most popular flower. Its long blooming season usually extends from early summer until very hot dry weather and no other climber equals it for cutting, either for use in bouquets or for table decoration. Hundreds of varieties have been offered for sale by seedsmen but owing to recent marked improvements many sorts are decidedly inferior and have been dropped from our list. In describing varieties, by "standard" is meant the wide petal at the top of the flower; the "wings" are the two petals below.

EARLY Christmas varieties will produce Sweet Peas in profusion even in the open ground fully three weeks ahead of the Spencer and Grandiflora types. The plants come into flower when only twelve inches high, and in the open ground never attain a height of more than three to four feet. When grown under glass during the fall, winter, and spring, they will continue to flower continuously for from three to four months,—the vines reaching a height of from eight to ten feet.

Nasturtiums---Dwarf Varieties

FOR ease of culture, duration of bloom, brilliancy of coloring, and general excellence, nothing excels Nasturtiums. Few plants are more easily grown or remain longer in bloom than this with its large shield-shaped leaves and beautifully irregular flowers having long spurs and brilliantly colored petals. In favorable soil flowers are produced in abundance throughout the season. Seed is usually sown outdoors as soon as the weather is warm and settled, in the row where the plants are to remain. Well pulverized soil, preferably well drained and moderately rich, should be used and the seed covered with about one inch of fine soil firmly pressed down. A sunny situation is essential for free blooming. If the soil is very rich the plants give a large amount of foliage but few flowers. For earlier blooming, start indoors and transplant to the open ground after danger of frost is over. Much used for window boxes. Nasturtiums are usually free from insects of any kind

Lawn Grass—Continued.

ALL GRASS SEED PRICES ARE SUBJECT TO MARKET CHANGES

Formation of Lawns to Be Sown

ONE LB. WILL SOW 300 SQUARE FEET. 40 TO 50 LBS. TO THE ACRE.

THE ground should be thoroughly drained and well prepared, but the surface should be as much alike in quality as possible and thoroughly pulverized. After sowing, the ground should be rolled in order to press the seed firmly into the soil. The proper time to sow grass seed depends, of course, upon the latitude. In this vicinity from early Spring to hot weather. Seed may also be sown in the Fall, provided it is done early enough to secure a good, strong growth before Winter sets in. The sowing should be done when the ground is moist, or before an expected rain, and a subsequent rolling is always advisable. As to weeds in newly made lawns, it may not be generally known, but many weed seeds actually lie dormant on the ground for six or seven years and will germinate and make their appearance when the soil is turned up. It requires at least 1 lb. of seed to every 300 square feet of ground, not already seeded, to give best results.

Rolling—As soon as the frost is out of the ground in the Spring, the land should be gone over with a heavy roller. Winter frosts loosen the soil, and rolling is

necessary to compress it again. If grass seed is to be sown, this should be done first and the rolling immediately afterward. Roll frequently.

Mowing—All turf-forming grasses are improved, both in vigor of root-growth and in fineness of texture by frequent mowings. It is impossible to say just how often the grass should be mown, as that depends upon the rate at which it grows. Too close cutting should be guarded against, however, especially during the hot Summer months, when the roots require some top growth to protect them from the burning sun. A good top growth is also necessary to protect the roots from severe winter frosts.

To Grass a Bank or Terrace—For each square rod, take a pound of lawn-grass seed, and mix it thoroughly with 6 cubic feet of good, dry garden loam; place in a tub, and add liquid manure, diluted with about two-thirds of water, so as to bring the whole to the consistency of mortar. The slope must be made perfectly smooth, and then well watered, after which the paste should be applied.

FANCY KENTUCKY BLUE GRASS

THIS famous grass is well known in all sections. It generally grows well on any stiff or loamy soil in Central and Northern States where rich, moist though moderately well drained. Kentucky Blue Grass is at its best in the Spring and Fall months, but being rather sensitive to heat does not grow luxuriantly during Summer. It takes a considerable time to get a good stand of this, as it grows very slowly at the start, but, when once established forms a close, compact turf, making a fine lawn. It is better to use a combination of grasses than Kentucky Blue alone, as other grasses which grow more luxuriantly at first will form the sod, but when Kentucky Blue is well established it will gradually spread over the entire plot. Price: **Lb., 25c; 7 Lbs., \$1.60; Bu., \$3.00; 100 Lbs., \$18.50.**

GOLF LINKS MIXTURE

WE have given much attention to Grasses for Golf Courses. This Mixture is composed of foreign Grasses that thrive here, with the addition of several fine American varieties, and are the result of experiments conducted on our grounds, as well as careful watching for several years of the practical results obtained on Golf Courses sown with our Grass seeds. By the use of this Mixture, and with proper care, the finest Fair Greens and Putting Greens in the world can be successfully rivalled. If conditions are favorable, a good playing turf may be secured in eight weeks from time of sowing and will last indefinitely. Price: **Lb., 30c; 10 Lbs., \$3.00; 100 Lbs., \$27.00.**

PUTTING GREEN MIXTURE

ACAREFUL study of the requirements for making the most substantial turf for Putting Greens developed the mixture herewith offered by us for this purpose. The varieties comprising it are all of the finest-bladed, low growing and most hardy kinds, and maintain their rich, green color throughout the season. We also recommend it for terraces, embankments and steep slopes. Price: **Lb., 40c; 10 Lbs., \$4.00; 100 Lbs., \$34.00.**

GOOD RESULT MIXTURE

THIS is intended for back yards, large playgrounds, etc., that are not intended to be kept cut as closely as other front lawns, and where grass is wanted quick to cover unsightly places; also for tenants who do not intend to stay long on the premises, yet want a good grass. We would advise setting the lawn mower as high as it will go in cutting this grass, and not water often, but when you do, do it in earnest, or else keep the water off. This rule should apply to all lawn grasses. Watering often burns out the grass more than you may think. The grass mixture will give value received for your time and money spent and will enable those who don't want to spend much on the lawn a chance to have plenty of green grass. Price: **Lb., 15c; ½ Bu. (7 Lbs.), 85c; Bu. (14 Lbs.), \$1.70.**

RHODE ISLAND BENT GRASS

THIS is our very best grass for mixtures, being hardy, and the creeping habit of its roots, constantly adding to the size of its plant, forms the closest mat. Will stand severe rolling and constant cutting. Should be in all lawn mixtures, but on account of its very high price, is rarely used. Our seed of this valuable grass is of the highest germination and purity. Price: **Lb., 40c; 10 Lbs., \$3.50; 100 Lbs., \$32.00.**

WHITE OR DUTCH CLOVER

ALOW, close growing clover; round white heads, very fragrant. Very desirable for beautifying the lawn. It will stand close cutting and very rapidly throws up an abundance of leaves and blossoms. It is usually better to sow with other grasses. Does well on most any soil. Price: **Per Lb., 45c; 10 Lbs., \$4.00.**

Fertilizers

For Lawn, Garden, Field and House Plants

A NECESSITY TO ALL GROWING PLANTS

THE farms of our land were never in such need of fertilizing as they are today. The Government Experiment Stations have proven that with the use of fertilizer you can raise much larger and finer crops, and without drawing on the land for all its nutriment. Report shows that the Western States are "waking up" and that there has been from 500 to 1000 per cent more increase in different States in the past year in the use of

fertilizers. Eastern farmers never think of sowing wheat and grasses without sowing fertilizer also, and our Western customers will soon do the same. The proper time to fertilize in St. Louis latitude is September for Fall sowing and March for Spring sowing.

Here is a Fertilizer that will satisfy those who are skeptical as to the use of Commercial Fertilizers.

Pulverized Sheep Manure

AS a top dressing for lawns there is nothing better. Promotes a steady and rapid growth in the vegetable garden. For garden and field crops. 1 to 2 tons per acre, one-half before plowing, balance before harrowing. For top dressing use 1 ton per acre—Fall or early Spring. Price: 5 Lbs., 20c; 10 Lbs., 35c; 25 Lbs., 75c; 50 Lbs., \$1.15; 100 Lbs., \$2.00; 500 Lbs., \$8.50, delivered in this city. Special Prices on Ton Lots.

Pulverized Hog Manure

IS without any doubt one of the most powerful fertilizers. It is especially adapted for garden use, as well as for all grain crops. Potatoes will pay big where this is used. It is prepared in such shape it can be drilled with any farm seed drill. It is free from all foul seeds and always ready to use. Why should you raise crops that fail to yield, because you could not get the kind of fertilizers you needed heretofore? But you can't say that now. The above three fertilizers are pure, and if you figure what it costs you to haul stable manure from the city you will find you can buy the above brands much cheaper and have all you want for your crops.

Ask us, when in our store (or come in and see us) about these, and look at samples and see for yourself. Try it and be convinced, as we are. Price: 100 Lbs., \$2.00; 500 Lbs., \$8.50; Ton and Carload Lots at special quotations.

Evergreen Fertilizer

Clover Seed

(60 Pounds Per Bushel.)

(Field Seed by mail add 8c per lb. for postage.)

CLOVER can be sown in the Spring, from February to April in this locality, varying earlier or later according to other latitudes. Excellent results can also be obtained from sowing it on late snows, as with the melting of these the seed soaks into the earth about the right distance. Light grass seeds, however, sown on snows, are apt to float away and not have sufficient coverage, hence not recommended. The Summer and early Fall sowing of clover is also giving most satisfactory results, and a full crop can be cut the succeeding year when this is done.

ALFALFA CLOVER (Fancy)—The King of Forage Plants—Alfalfa is the corner-stone upon which is being built the prosperity of wide areas of our agricultural country—with its never-failing four and five crops of from six to twelve tons per acre; its great fattening qualities for horses, cattle, hogs, sheep and poultry, its drought-resisting qualities. After once being rooted, its perennity is more than two decades. This seed is selected from the best seed produced. We will be glad to send a sample to any one about to purchase. When writing for sample, state quantity of seed you wish to buy. 15 to 18 lbs., is usually sown to the acre. Price: Lb., 25c; 10 Lbs., \$1.75; Bu., \$10.00; 100 Lbs., \$16.00.

ALSIKE OR SWEDISH CLOVER—A very hardy variety that succeeds on any kind of soil and resists extremes of heat and drought. It is usually planted in mixtures with grasses for pasturage and for hay; especially with timothy. It is excellent for bees. Price: Lb., 25c; 10 Lbs., \$2.40; Bu., \$13.75; 100 Lbs., \$22.00.

RED CLOVER—This is regarded as the most valuable of the Clover family. It makes two crops each year. The first is usually cut when it is in blossom for hay; the last crop may be harvested for seed, cut for hay, or plowed under to add fertility to the soil. It may be sown either in the Spring or Fall, and if no other grasses are used, at the rate of from eight to twelve pounds to the acre, according to quality of seed used and condition of the soil. Clover adds greatly to the fertility of the land on which it is grown. It does not exhaust the soil, but enriches it. It pays always to buy the best grade of Clover seed which can be obtained. Our strictly "Fancy Re-cleaned" grade cannot be surpassed by anyone. Price: Lb., 25c; 10 Lbs., \$2.00; Bu., \$11.00; 100 Lbs., \$17.00.

MAMMOTH CLOVER (Sapling)—Grows much taller and heavier than common Red Clover. Produces an enormous yield and is of high feeding quality. Price: Fancy re-cleaned, Lb., 25c; 10 Lbs., \$2.00; Bu., \$12.00; 100 Lbs., \$19.00.

Permanent Pasture Mixtures

FOR every different kind and condition of soil there are a large number of grasses which are especially suitable. Some sorts do best on high ground and in dry weather; others prefer plenty of moisture. Some mature so early and others so late that from the beginning of Spring until Winter sets in there is no time when one species or another is not at its best. From these considerations, the importance of sowing many varieties for pasture and meadow purposes will be apparent.

PASTURE MIXTURE "A"—Good Moist Soils. Sow 25 pounds per acre. This is intended for the average soil. Use more seed where land is dryer. If stock does not keep down to six or ten inches use the mower to do so. Do not pasture too closely. This is well suited for "patching" your present pasture by disking or harrowing in. Price: Lb., 25c; 10 Lbs., \$1.75; 100 Lbs., \$16.00.

PASTURE MIXTURE "B"—Dry, Hilly Uplands. Sow fifteen to twenty pounds per acre. Recommended for rolling ground, or where stones or sand in soil demand

drought-resisting varieties. Plow or disk in where possible, and on unplowed, stumpy or stony ground brush thoroughly. Price: Lb., 25c; 10 Lbs., \$1.25; 100 Lbs., \$16.00.

PASTURE MIXTURE "C"—Shaded Pastures. Sow 25 to 30 pounds per acre. This is especially planned to suit the woods, which is often waste except for its timber. Get the seed on and into the ground; do not leave on top of the leaves. The more open use the more seed. Price: Lb., 25c; 10 Lbs., \$2.25; 100 Lbs., \$20.00.

For grain, sow in drills not later than June 20th. Fancy—Price: Lb., 10c; 10 Lbs., 50c; Bu., \$1.75; 100 Lbs., \$3.50.

Seed Corn

A BUSHEL of seed corn will plant from six to eight acres. To use our seed, will cost, say thirty to forty cents an acre more than if common crib or home grown corn is planted. It is therefore evident that if our seed produces one bushel more to the acre, mind only one bushel more, than the home seed, that the entire cost of the seed and freight is paid for by this extra yield. It is therefore evident that if seed corn was worth \$5.00 a bushel, it would be cheaper to plant such seed than to use common corn as a gift.

Price: Pk., 65c; ½ Bu., \$1.15; Bu., \$2.00; 5 Bu., at \$1.90 per Bu.

St. Louis Seed Co.'s Select Seed Oats

It Costs Less to Grow Good Oats than Poor Ones. Change Your Seed Now

PRICES quoted on Field Seeds are those in effect at the time this catalogue goes to press. We will maintain these prices as long as possible, but cannot guarantee them throughout the season. All values are subject to market fluctuations and seed is offered, subject to prior sale. Order early before our stocks are exhausted.

SWEDISH OATS (Canadian Grown)—While it is our desire to have as many of our customers as possible order a quantity of the Regenerated Swedish Oats, our regular Swedish Oats have given general satisfaction. For the benefit of these we have secured seed which is of the usual high standard. These were originally quite a late variety, made early by growing in the high altitude in which they were developed. They are an improved strain of the Swedish Oats we have been offering for several years.

The Regenerated Swedish Oats are extremely early, and in yield, far superior to the Swedish. Under ordinary growing conditions, however, a yield of fifty to seventy-five bushels is quite certain. The quality of the grain is also superior to the Swedish, the kernels being more plump, and very heavy. We recommend sowing 2 to 2½ bushels per acre depending upon the richness of the soil. These oats will do remarkably well on rich land providing a thoroughly worked seed bed is prepared and a uniform seeding is made. Price: Bu., \$1.25; 10 Bu., \$1.20 per Bu.

SILVER MINE OATS—The heads are very large in proportion to its stiff, bright, clean straw. The sprangle top heads, although long, are borne low down on the stalk, which seems to prevent lodging. The straw is valuable for feed and for bedding. As a rule, oats yield a greater profit an acre than wheat, and they are also a more reliable crop. Price: Bu., 90c; 10 Bu., 80c per Bu.

BLACK DIAMOND OATS—Very productive, stools heavy, stands well and succeeds in a wide range of country. Price: Bu., 90c; 10 Bu., 80c per Bu.

TEXAS RUST PROOF—The Ideal Rust Proof variety, grown extensively throughout the South, an immense yielder, a sure cropper. Price: Bu., 85c; 10 Bu., 75c per Bu.

WINTER TUFF OATS—Sow in October or early November, make a good growth before Winter sets in, and can be relied upon to furnish the finest of green pasture all Winter through and a good crop of grain the next Spring. Price: Bu., 90c; 10 to 20 Bu., at 85c per Bu.

Fall Winter Wheat

Prices Subject to Change
Most Productive Wheat Ever Discovered
SMOOTH HEAD VARIETIES

THE yield of the Winter Wheat an acre is on the average very much larger than any of the Spring Wheats. Winter Wheat has not been extensively grown in Minnesota and the Dakotas until recent years, on account of its inability to withstand the severe Winters.

NEW PROSPERITY—Its mammoth record yield of 45 bushels per acre famed it as the world's leader. Our New Prosperity is a smooth, strong healthy wheat and is seldom troubled with insects that effect other wheats. The straw is very long with big, full solid heads. In fact, it is the wheat that will make any man dollars. Price: Bu., \$1.50; 10 Bu., \$1.45 per Bu.

FULTZ'S MEDITERRANEAN—This is the best Blue Stem Wheat of which we have knowledge. It has given an average yield for the last 13 years, through favorable and unfavorable seasons, of 36 bushels an acre. As the wheat ripens, the stem and straw assume a beautiful golden-yellow hue, and entirely free from rust. This variety has no beards and is especially adapted to the older wheat-growing sections of the Northwest. The kernel is of the hard variety; very productive. Price: Bu., \$1.50; 10 Bu., \$1.40 per Bu.

PEDIGREE FULTZ—A standard variety. Does well in some localities, but cannot compare with newer kinds now offered. Price: Pk., 50c; ½ Bu., 85c; Bu., \$1.50; 10 Bu., at \$1.40 per Bu.

Varieties

New Irish Cobbler

A FINE EARLY WHITE POTATO

THIS has become one of the general favorites in all localities for early as well as late planting. When it was first sent out it was not claimed to be particularly early, but extensive growing in this locality proves that it is fully as early as Queen of Hebron. The yield at digging, both before the potatoes are ripe and after maturity, is very large and far superior to many of the high-priced "novelties," besides nearly all ordinary sorts in general use. The particular feature which impresses our many growers are the general thriftiness of the vines, combined with a remarkably large yield of fine, large, most attractive, pure, white-skinned potatoes. The tubers are round in shape, eyes somewhat deep, and tubers of both fine appearance and quality. There is a heavy demand for Irish Cobbler potatoes from all sections. Price: $\frac{1}{2}$ Pk., 25c; Pk., 50c; Bu., \$1.50.

Big Buster

THE finest late potato in existence. Its make-up is of the most handsome type and as a main crop it will prove itself supreme. It is of large size, white skin, eyes shallow, very white inside, dry and mealy. Its yielding qualities are far ahead of any on the market today. Why people will plant old, worn-out varieties, when they can get such new ones as these, is a mystery to us. We have only a limited supply this season. Price: $\frac{1}{2}$ Pk., 25c; Pk., 50c; Bu., \$1.50.

New Early "Dix" Potato

THE Pride of the "Red River Valley." We offer it to you now as "The Earliest Potato Grown." We are ready to stake our reputation that you will say so, too, when you have tried it. It is of the most uniform growth ever known. It is earlier than the famous Early Ohio. It is better as a yielder, and has no yellow or black core. Its tops are of an upright growth, bush form. Its skin is of a light red-pinkish color; its eyes are very shallow, and many; its dry and mealy nature is supreme. Price: $\frac{1}{2}$ Pk., 25c; Pk., 50c; Bu., \$1.75.

The Pennsylvania Rotary Lawn Rake

THIS is virtually a revolving lawn comb, having flexible steel wire teeth which go between the blades of grass and comb out all dead grass, crab grass, leaves, sticks and other rubbish. It leaves the grass standing upright. The action of the three revolving rakes raises up the creeping crab grass and other low growing weeds so the lawn mower can cut them before going to seed, thus effectually ridding the lawn of annual weeds. It has a dumpable collecting box. This work is most effectually accomplished by the use of the Pennsylvania Gem Lawn Cleaner and Rake. One man can do more work than four with rakes (See cut). Price: 24-inch machine, \$16.00. (Weight packed for shipment, 90 Lbs.)

The Pennsylvania Rotary Lawn Rake

"Velvetlawn" Seeders

THERE are eight single discs on the machine, set two inches apart. Therefore it plants eight rows of seeds at a time, or a strip sixteen inches wide. There are as many force feeds on the "Velvetlawn" Seeder as there are discs. Every feed sows an equal amount of seed, and the feeds can be set to sow any quantity desired. Each disc is independent in action and automatically conforms to the inequalities of the ground. Each disc has an independent roller which presses the soil back, covering the seed, allowing for uneven ground.

It does equally as good on old lawns as it does on new. Every seed trench contains an equal amount of seed. No seed is wasted. The seed must grow, because it is in the soil and not on top of it. The wind cannot blow it away. Birds and fowls do not get it. Neither can heavy rains wash it away. The discs do not tear the sod; they cut it, cultivate the grass roots and make a finely prepared seed bed. For work in gardens and new grading the discs pulverize the soil. Price: Each, \$10.00.

"Velvetlawn" Broadcast Seeder or Fertilizer Sower

THIS machine is same size as Seeder, except it does not have the discs and sows seed on top of the ground. It is inexpensive and does the work far better and more even than by hand. Price: \$4.00.

The Universal Lawn Trimmer.

The Universal Lawn Trimmer

Price: \$5.00.

Lawn Rollers

YOUR LAWN NEEDS A ROLLER

Dunham "Water Weight" Roller

THE advantages of a roller, the weight of which can be increased or lightened at pleasure, can scarcely be overestimated. Often on light or sandy soil, or on newly made lawns, or in early spring when the ground is moist, or after a rainy spell, a lighter-weight roller is a necessity; then on thick sward or on hard soil, on walks and roads, a heavy roller is needed. With a **Water Ballast Roller** one can secure any weight desired, between minimum and maximum, by simply removing a thumb-cap from each end and filling the two hollow sections with as much water or sand as may be needed, which is easily and quickly done with a hose or through a funnel; and the roller is as quickly emptied. The inside being heavily galvanized, it will last for years.

These are perfect rollers, and do perfect work on lawns, tennis courts, golf grounds, roads, walks, etc. They are high grade in every respect, being carefully manufactured of best material. They will be found practically noiseless and very durable. The rolling surfaces are very smooth and will not gather grass or soil; the sections fit closely, leaving no mark, and the diameters are large, insuring a lighter draft for a given weight than is usual. The handle weights (shown in this illustration) are to counter-balance the weight of the handle and keep it in an upright position off from the ground. We recommend a roller having handle weights, as they add speed and ease of operation to the roller.

Mexican Double Yellow Head

A NATIVE of Mexico. They are of a beautiful plumage; as for talking, singing and whistling, they are superior to all other varieties. Its color is of a handsome dark green, with bright red and blue tinted feathers on the edge of the wings and tail, the top of the head being composed of a beautiful mass of pale orange color over his head and neck, thus giving it a very pretty appearance. Young birds in July and August. Price: Each, \$6.00 to \$9.00.

St. Andreasberger Canary

THESE little birds are natives of the country surrounding the world-famous town of St. Andreasberg, Germany, and are shipped to us direct. It is in that locality that the world's best canary breeders are located. They are famous for their soft, rolling notes, often keeping one bar of notes going until you think they would drop exhausted. But not so—they hop to another perch and continue the same sweet melody as though it were their sole enjoyment. We have no hesitancy in urging everyone to order one or two of these little home companions. Their voice is never harsh and they often learn to imitate a tune that you might care to teach them. They grow very much attached to the home folks and we know of a number of people who let them out of their little cages and play with them. Price: First-class male Singers, \$5.00; female Birds for breeding, \$1.50.

The Celebrated Hartz Mountain Canary

No Instrument, No Matter How Sweet the Tone, Can Blend the Harmonious Melody That Comes Forth From Their Little Melodious Voices. They Add a Spark of Happiness to Any Home.

THESE sweet singing birds are sold by the thousands from our store; in fact, they are considered by many the most satisfactory of all singers. They are natives of Germany and are bred high up in the famous Hartz Mountains. We do not begin to receive them until the summer months, and by the time spring approaches we have scattered them all over the land and helped cheer many a home that was sad and forlorn. The sweet notes from these little cage pets are by far the sweetest tones that one can hear, and they are the most loved of all caged birds. We thoroughly test each and every bird's voice before shipping and we will not send a bird out that is not first-class in every respect. We would be pleased to have you mention the color you desire, as everyone knows that canaries vary from a bright to a pale yellow, some with spots of dark, and many times the darkest color birds are the finest songsters. However, we can please you at all times regarding a good singer in almost any of their natural colors.

Price: First class male Singers, only \$2.50 Each.
Female Birds for breeding purposes, \$1.00 Each.

Fancy Gold Fish

DECORATE YOUR HOME WITH THESE BEAUTIFUL PETS.
NO HOME SHOULD BE WITHOUT THEM.

Common Gold Fish

THESE are the most popular of all the aquarium inhabitants. First, because they are hardy; and, second, for beauty of color and neatness in appearance they cannot be surpassed. These fish were formerly natives of Chinese waters, but in recent years the American breeders have learned that they cannot only breed this specie of a more brilliancy than the imported stock, but a fish that is acclimated as well. In fact, there are no more Gold Fish imported from China. The Gold Fish that we offer are the finest specimens obtainable. With their beautiful golden-red brilliancy they not only add an ornament to any home, but they make the finest pets as well. We quote fancy stock, according to size, at only 5c, 15c, 35c, 50c, 75c, and \$1.00 each.

Japanese Fantail Fish

THIS variety is one of the most popular of all fancy fish, the fins and tail being of the finest lace-like formation with a tail of a V-shape. They are variegated in color, being of a golden-red, pearly-white and black coloring. We import this variety direct from Japan. They are rather expensive, but if you want a fish that will beautify your aquarium you cannot afford to be without this specie. Price: Each according to size and coloring, 50c, \$1.50, \$2.00 and \$2.50.

Telescope Fish

THIS is another native of the Japanese waters, noted for their oddity, having eyes that bulge out like telescopes. The tail is single, double and sometimes triple. This variety is very scarce owing to the great demand for them to finish out the aquaria, giving it the touch that will always attract attention. We can supply you with fine specimens of these fish at 50c, 75c, \$1.00 and \$1.50 each, according to size. In color they resemble the ordinary Gold Fish.

Tadpoles
